GULF OF MEXICO

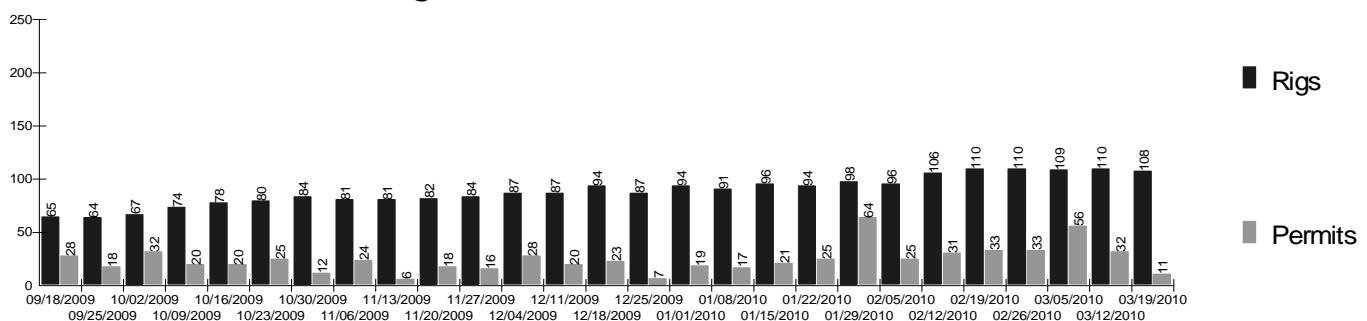

What's New This Week...

Mobile rig utilization in the Gulf of Mexico fell slightly last week. One contracted rig left the region and one newbuild, idle jackup was added to the count. Total fleet utilization was 62.2 percent with 74 of 119 mobile rigs under contract or committed for work. Marketed utilization, which excludes those cold stacked and other non-marketed rigs decreased to 88.1 percent with 74 of the 84 units under contract or committed for work.

Jackup utilization inched downward to 50% with 40 of 80 jackups under contract. Marketed utilization remained at 80% with 40 of 50 rigs contracted. Perforadora Central newbuild jackup Tuxpan, delivered in February, was added to the rig count, accounting for the change. Within the jackup fleet, 17 of the 40 contracted units (42.5%) have contracts that do not expire for at least 90 days.

Total and marketed utilization for the floating rig fleet remained at 100% with 26 semis and 7 drillships under contract or committed for work. One rig, Diamond Offshore semi Ocean America departed the area headed for Australia.

Gulf of Mexico Rig Counts & Permit Counts - A Six Month Review

Headline News

The **Minerals Management Service (MMS)** received \$949,265,959 in high bids in its Central GOM Lease Sale 213, held March 17 in New Orleans. Some 77 companies submitted 642 bids on 468 blocks in the sale. The total of all bids received was \$1,300,075,693. A breakout of water depths showed that 151 of the 468 blocks were in water depths of 656

Driller News

Seahawk Drilling has received a contract extension for one of its jackups and a new contract for another. First, **Arena Energy** has exercised its 60-day option on *Seahawk 2602* that will keep the rig busy to June 10. The operator has also signed a deal that will keep the rig for at least another 35 days to July 15. Arena is currently working the rig in Main Pass 236 and the option work will also be in the Main Pass area. Seahawk also reports that Apache will not exercise its 90-day option on jackup *Seahawk 2600* and will finish work with the rig in mid-April. **Peregrine O&G** has now signed the rig up for a 60-day plus one option well program that will take the rig to North Padre Island 975 for two wells and High Island A-268 for a third. If exercised, the option well will be in the Galveston area. The work now keeps the rig working to mid-June.

Hercules Offshore has received a new contract from **LLOG Exploration** for jackup *Hercules 201*. Work in the High Island area will begin in late April with a 55-day dry hole drilling time. The rig is currently working in Eugene Island 120 for **Devon Energy**. Devon had a 30-day option on the rig, but that will not be exercised, freeing up the rig for the LLOG work. Jackup *Hercules 251* left Sabine Pass over the weekend, headed for Chandeleur 43 for the start of its 100-120 day contract with LLOG. Finally, rumors indicate that Hercules will have a contract in place shortly for currently idle jackup *Hercules 205*. The rig, which recently returned to the U.S. Gulf from Mexico, is the marketed unit Hercules owns that is idle.

The contract start with **Shell** for newbuild semi *Noble Danny Adkins* has been pushed back from mid-March to the first-half of April. The rig, which arrived in the U.S. Gulf on January 19, has a four-year contract with Shell starting April 10.

Platform rig *Blake 1502* has completed work for **Apache** in South Pass 75 and is now rigging down. Upon completion of operations around the end of the month, the rig will demobilize to Houma where it will be hot stacked.

Jackup *ENSCO 75* has sustained damage after it collided with an underwater obstruction, rumored to be the wreckage of jackup *ENSCO 64*, which was destroyed in Hurricane Ivan in 2004. The rig was under tow from Viosca Knoll 734 to Main Pass 283 when the incident occurred. It is understood that the rig will undergo repairs for about two weeks, after which it will return to its contract with **W&T Offshore**, which runs to at least mid-May.

Mariner Energy has exercised its one-well option on jackup *Seahawk 2504*. The additional work will consist of a 45-day well in Eugene Island 269. Operations are scheduled to begin in mid-April when the current well in West Cameron 112 is completed. The new well now keeps the rig busy to the end of May.

Enco International, plc announced that subsidiaries of the company have sold two jackup drilling rigs, *ENSCO 50* and *ENSCO 51*. Both are F&G L-780 MOD II-C designs built in the early 1980s. The rumored buyers for the rigs are **Great Offshore** and **Jagson International**, respectively. The combined sale price for the two rigs is approximately \$95 million.

Of Interest

feet or less, 32.2 percent of all blocks receiving bids. On the opposite end of the spectrum, 141 of the 468 blocks (30.1 percent) like in water depths over 6,500 feet. A deepwater block in Walker Ridge 793 attracted the highest bid of the sale, with a consortium of **Anadarko** and **Mariner Energy** bidding \$52,560,000 for the block. Overall, **Maersk Oil** had a part in 63 high bids, spending \$97,315,497 on those bids. Anadarko exposed the most money in the sale; \$127,593,668 on 48 high bids. Bid evaluations will now begin with the final awards to be made in about 90 days.

Operator News

Shell has announced a significant new oil discovery in its Appomattox prospect in Mississippi Canyon 391 and 392. **Transocean** semi *Deepwater Nautilus* drilled the discovery well in Block 392 to a TD of 25,077 feet, encountering 530 feet of oil pay. An appraisal sidetrack was then drilled to a TD of 25,950 feet, which encountered 380 feet of oil pay. Water depth at the site is 7,218 feet of water. Shell plans additional appraisal drilling later this year. Shell owns an 80 percent working interest in the prospect, with **Nexen Petroleum** holding the remaining 20 percent.

ExxonMobil announced that U.S. antitrust regulators have cleared the company's pending merger with **XTO Energy**. ExxonMobil said the waiting period for the merger under the Hart-Scott-Rodino antitrust act expired March 15 without further comment from U.S. authorities. The **Dutch Competition Authority** cleared the transaction March 9. Closing of the deal remains subject to approval by the shareholders of XTO Energy as well as other conditions provided in the merger agreement. It is expected that the transaction will close in the second quarter.

Anadarko Petroleum Corporation provided an update on its successful deepwater drilling at its Vito appraisal well in Mississippi Canyon 940. The Shell-operated Vito well encountered more than 600 net feet of high-quality oil pay in thick subsalt Miocene sands after being drilled to TD 31,000 feet in approximately 4,050 feet of well. Anadarko holds a 20-percent working interest; **Shell Offshore** holds a 55-percent working interest; and **Statoil USA E&P** holds the remaining 25-percent working interest.

Noble Energy reports it was the apparent high bidder on 16 deepwater leases in recent Central Gulf of Mexico Lease Sale 213. The operator bid jointly on one of the blocks and alone on the remaining 15 blocks. Noble's share of the lease bonuses totaled \$37.7 million and covered in excess of 82,500 net acres in water depths up to 7,800 feet of water. If all of the bids are awarded, Noble's total acreage position in the deepwater Gulf will increase to over 472,500 net acres.

Colombian state oil company **Ecopetrol** says it was the apparent high bidder for 19 blocks Central Gulf of Mexico Lease Sale 213. Bids were submitted by the company's U.S. subsidiary **Ecopetrol America, Inc.** Ecopetrol's interest in five of the blocks is 100 percent, while it placed bids in 10 blocks with interests ranging between 40 and 60 percent in partnership with **Repsol E&P USA**, while the remaining four blocks were bid with partner **Eni Petroleum U.S., LLC** with Ecopetrol holding a 25 percent interest. Total bids submitted by Ecopetrol totaled around \$15 million. Water depths for all 19 blocks were over 1,300 feet.

Service/Supply News

FMC Technologies has appointed John T. Grempp, President and Chief Operating Officer. Mr. Grempp will succeed Peter D. Kinnear as President. In addition, Robert L. Potter will succeed Mr. Grempp as Executive Vice President of Energy Systems.

Baker Hughes and **BJ Services** announced that at their respective special meetings of stockholders held recently, Baker Hughes' stockholders and BJ Services' stockholders each voted to adjourn their meetings. The parties are making progress and continue to work toward obtaining the required regulatory approval from the Antitrust Division of the U.S. Department of Justice in connection with the merger. As previously reported, the companies do not expect any resolution to be material to the business or financial performance of the combined company following the merger.

Gulf Island Marine Fabricators, LLC received a letter of intent to participate as a sub-contractor in the construction of two 60-meter offshore support vessels for the Iraqi Navy. The primary contractor for the project is **RiverHawk Fast Sea Frames**, a Tampa, FL shipbuilder.

ION Geophysical Corporation announced that its cableless land seismic acquisition system, FireFly[®], will be used by **Apache Corporation** to acquire data on two separate projects in Argentina.
